

Purna Jear Swami

✉ purnajear@gmail.com | ☎ +91 9966890363 | [🐙 GitHub](#) | [in LinkedIn](#)

Summary

B.Tech in Computer Science (Big Data) with expertise in Python, SQL, AWS, and backend development. Skilled in building scalable APIs, CI/CD pipelines, and cloud-based solutions. Passionate about solving complex problems and driving innovation.

Work Experience

Freelancer (Outlier)

Oct 2024 – Present

AI Model Training & Backend Development

- Trained AI models using Python and optimized workflows for large datasets.
- Developed RESTful APIs and integrated backend solutions for real-time data processing.
- Deployed scalable solutions on AWS (S3, EC2) and automated workflows.

Agumentik

Jun 2023 – Aug 2023

UI/UX Developer Intern

- Designed responsive web interfaces using HTML, CSS, and JavaScript.
- Optimized Postgres databases for backend efficiency.
- Integrated secure OAuth APIs and managed CI/CD pipelines with Jenkins.

Projects

Expenso iOS App

May 2024 – Jul 2024

Technologies: Swift, UI/UX Design

- Developed a financial iOS app with features for expense tracking, budget management, and insights.
- Integrated cloud data storage using AWS S3 for secure synchronization.

Classroom Behavior Analysis System

Jan 2025 – Present

Technologies: YOLOv8, ByteTrack, OpenCV, Streamlit, Python, Pandas, Roboflow

- Built a CV system to detect and track 14 classroom behaviors with YOLOv8 + ByteTrack.
- Used face embeddings for student re-identification across frames.
- Designed a Streamlit dashboard with timelines, heatmaps, and engagement scores.

Education

B.Tech in Computer Science Engineering (Big Data)

Aug 2021 – May 2025

SRM University AP | Relevant Coursework: Cloud Computing, Database Management, Data Structures.

Higher Secondary (12th Grade)

Jun 2019 – Apr 2021

Presidency Jr College (BIEAP) | Courses: Mathematics, Physics, Chemistry.

Secondary (10th Grade)

Jun 2007 – Apr 2019

Ravindra Bharathi School (BSEAP) | Courses: Mathematics, Science, Social Studies.

Skills

Languages: Python, SQL, JavaScript, Swift

Web and UI: HTML, CSS, Figma, Adobe XD, Wireframing, Prototyping

Databases: MySQL, SQL Optimization

DevOps: Docker, Jenkins, Git, CI/CD Pipelines

AI/ML: YOLO, OpenCV, Pandas, AI Model Training, Data Annotation

APIs: RESTful APIs, OAuth, Integration Testing

Achievements

HackSRM 2024 Winner

Mar 2024

Project: wave.io

- Built a multilingual audio diarization and analysis platform using Python, Django, and MongoDB.
- Delivered real-time speech segmentation and sentiment analytics from uploaded audio clips. [GitHub](#)
